NPI Profiller

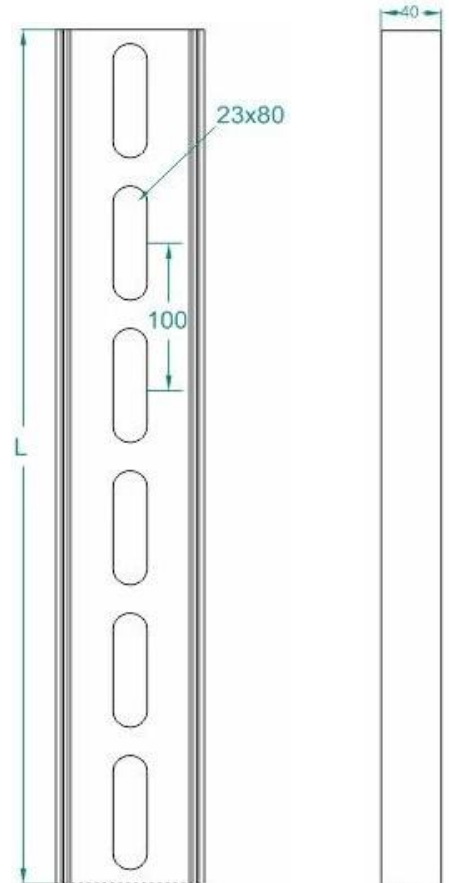

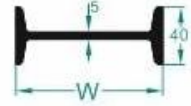

NPI Profil STS-I80

NPI profil demiri aslında birçok kişinin adını bilmediği bir demir türüdür. Bu yüzden sektörde I demir olarak da adlandırılır. Az ya da çok katlı binaların yapımında tercih edilen bu ürünlerin dayanıklılığı son derece artırılmıştır. En uygun standartlar ise 80/400 mm aralığındadır.

Gemi sanayinde, inşaat sektöründe, iş makinelerinin üretiminde ve mobilya – beyaz eşya sektöründe kullanılan I demir, sağlamlığı ve taşıma ömrü ile de kablo taşıma sistemlerinde en çok tercih edilen malzemedir.

NPI Profil Destek Sistemi STS-ID80

NPI profiller, flanş bölgeleri konik formu olarak tasarlanmıştır. Bu profiller yapı/İNŞAAT sektörünün temel ihtiyacı olmakla birlikte, temel konstrüksiyon, altyapı ve makine imalat sektörlerinde sıklıkla kullanılmaktadır. Geniş kalite ve kesit aralığında üretim imkânı bulunan profiller, kısa teslim süreleri ile müşterilerimize sunulmaktadır.
